

PRANALI SANDEEP HAGARE

AI & Data Science Engineer

📞 +91-9356463434 · ✉ pranalihagare@gmail.com · 📍 Pune, Maharashtra
🌐 Portfolio · 🔗 LinkedIn · 🐙 GitHub

Professional Summary

Results-driven **AI & Data Science Engineer** with expertise in Python, Django REST Framework, Machine Learning, Deep Learning, SQL, and Generative AI (RAG, LangGraph, LLMs). Co-author of an Indian Govt. Copyright and an IEEE publication. Skilled in developing secure RESTful APIs, real-time computer vision translation engines, and agentic AI platforms.

Technical Skills

Languages & Frameworks: Python, SQL, Django, Django REST Framework (DRF), FastAPI, Flask, REST APIs, OOP
AI / Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, EDA, Regression, Classification, Clustering, Random Forest
Deep Learning & Neural Networks: ANN, CNN, RNN, LSTM, Bidirectional GRU (Bi-GRU)
Generative AI & LLMs: RAG (Retrieval-Augmented Generation), LangGraph, Groq API, Vector Databases (ChromaDB), Embeddings
Databases, Security & Tools: PostgreSQL, MySQL, Supabase, JWT Authentication, OAuth, RBAC, Git, GitLab, Postman

Work Experience

- Leometric Technology Pvt Ltd – Python Developer Intern** Jul 2026 – Present
- Designed RESTful APIs using **DRF** with **JWT authentication**, **Google OAuth**, role-based access control (**RBAC**), and API permissions. Modeled **MySQL/PostgreSQL** relational schemas and migrations; validated APIs via **Postman** and managed code with **Git/GitLab/GitHub**.
- Test Yantra – Associate Software Engineer** Nov 2025 – Apr 2026
- Engineered Python backend APIs, database integration modules, and **LLM/RAG** workflows for automated query processing. Integrated Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) into backend systems to automate query handling and data extraction. modeling pipelines.
- Oasis Infobyte – Machine Learning Intern** Jul 2024 – Dec 2024
- Developed supervised/unsupervised ML models using **Python**, conducting EDA and feature selection on **Pandas/NumPy** pipelines. Conducted Exploratory Data Analysis (**EDA**), **feature selection**, and data preprocessing with Pandas and NumPy for predictive modeling pipelines.

Projects

- HireSense – AI Resume Intelligence Platform** | *FastAPI, LangGraph, RAG, ChromaDB, Groq* **2026**
Architected a full-stack AI talent platform featuring candidate and recruiter portals powered by RAG vector matching, sentence-transformers, and Groq (llama-3.3-70b) for automated ATS resume auditing and match scoring. Built multi-step agentic workflows using **LangGraph** and deployed production backend services with **PostgreSQL/Supabase** integration.
- SignBridge AI – Real-Time Sign Language Interpreter** | *MediaPipe, OpenCV, Bi-GRU, FastAPI* **2024**
Developed a real-time gesture translation engine converting ISL/ASL signs into text and natural speech at **60 FPS** with **96.25% accuracy** and **94.82% Dice Score**. Formulated ambidextrous, distance-invariant landmark feature pipelines across 50+ video sequences per gesture using a **Bidirectional GRU / LSTM** architecture.
- CropSense – Precision Agriculture Optimization Engine** | *Python, Flask, GitHub Actions* **2024**
Trained a **Random Forest** classifier (100 trees) on 2,200 soil and climate records, achieving **99.32% test accuracy** across 22 crop categories. Deployed a **Flask REST API** backend with a responsive single-page interactive UI, automating deployment via **GitHub Actions CI/CD**.

Education

Vidya Pratishthan's Kamalnayan Bajaj Institute of Engineering & Technology **June 2024**
Bachelor of Engineering (B.E.) in Artificial Intelligence & Data Science – CGPA: 8.19 / 10.0 *Baramati, Pune*
